SERVICE TECHNICIAN JOB POSTING

POSITION SUMMARY:

Fedmet is searching for a full time, long term Service Technician. The successful candidate will be a highly motivated professional with the ability to work independently and with a team. A successful candidate will have experience in and a working knowledge of refractories and will possess the ability to analyze performance data and present results logically and succinctly. A qualified candidate will be able to interact with Fedmet's sales team and the customers' operational and purchasing teams.

ESSENTIAL DUTIES & RESPONSIBILITIES:

- Receive and follow instructions from the scheduler.
- Once on site, get details of the task to be completed and a history of what prompted the task
- Confirm that inventory is at appropriate levels for the work being performed.
- Inspect and install materials, report any problems.
- Document critical steps and observations while on site.
- Interview operators and record how the product is used.
- Record useful comments and note improper procedures
- Follow the product through its lifespan to document the materials performance.
- Profile the spent refractory and take pictures
- Provide a hands-on approach dealing with laborers and department heads
- Engage in quality control of product performance.
- Analyze and recommend improvements or solutions relating to the refractory.
- Document competitors' performance and any problems.
- Write reports and communicate with you key partners.

CRITICAL RESPONSIBILITIES:

- Keep informed on new product designs and material developments
- Take advantage of opportunities to promote Fedmet Refractories to potential new customers
- Make sure team communicates and works together towards common goals.

KEY BEHAVIORAL TRAITS FOR SUCCESS:

Communication Skills: Must have excellent interpersonal and communication skills both with individuals and in teams. Must be comfortable communicating both formally and informally within all levels of customer organizations.

Self-Motivated: Must be self-directed and have the desire to take on new challenges without being prompted and exhibit a strong work ethic.

Reliability: Must be able to deliver high quality engineered solutions to our customers in a professional and timely manner.
