

Fedmet

Global Innovation for
your High Temp World

MGO Briquette 65

Application: Fedmet's MGO Briquette 65 is a high-quality slagging additive used in steel aggregates for increasing MGO content in a slag.

Product Features: Consistent quality and chemistry for excellent and fast slag formation. Uniform sizing, minimum damage and product degradation during shipping which minimizes fines formation.

Fedmet provides quality engineered products and services for all your high temperature applications.

For 30 years, Fedmet has provided outstanding results for our clients within the iron, steel and non-ferrous industries. Our company's reputation is built on delivering high quality products made with the world's best raw materials.

Through the use of our vast global resources, Fedmet is committed to delivering an exceptional customer experience and innovative solutions to all of our clients.
